Entrepreneurship plays a vital role in the economic development of a country. Economic development of a country depends primarily on its entrepreneurs. An entrepreneur is very often considered a person who sets up his own business or set up his own industry. Women entrepreneurs may be defined as the women or a group of women who initiate, organise and operate a business enterprise. Empowering women particularly in Tribal Community has emerged as an important issue in recent times. The economic empowerment of women is a vital element of strong economic growth in a country. Entrepreneurship happens to be one of the best ways towards self sufficiency and poverty alleviation for women in a country where employment is not guaranteed. Involvement of women in entrepreneurial activities would ensure effective utilization of labour, generation of income and hence improvement in quality of life. Economic empowerment of women by entrepreneurial activities led to the empowerment of women in many things such as socio-economic opportunity, property rights, political representation, social equality, personal right, family development, community development and at last the nation development.

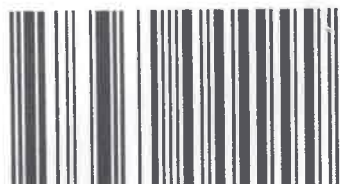

Babita Dubey

The Author has 27 years of teaching experience. She has completed two projects funded by University Grant Commission. She has published 14 papers in national and 24 papers in international journals. She is recognized guide in Pt. Ravishankar Shukla University, Raipur, Chhattisgarh, India.

CHILD LABOUR :

PSYCHO-SOCIO PERSPECTIVES

Dr.Reshma Lakesh

Marshwardhan Publication Pvt.Ltd.

Child is a bundle of joy-a flower incarnate in person. The sweet smile of the child pleases everyone. The brightness and future welfare of the society is closely interwoven with the brightness of the child and its careful upbringing. Childhood is the most important period of life, as it shapes adulthood Harlock (1981) said that most of the people think of childhood as a fairly long period in the life span, a time when the individual is relatively helpless and dependent on others. Childhood begins when the relative dependency of babyhood is over at the age of two years and extends to the time when the child becomes sexually mature at thirteen years for the average girl and fourteen years for the boy.

Today it is widely recognised that childhood should be subdivided into two separate periods-early & late childhood. Late childhood extends from the age of six years to the time the individual becomes sexually mature. At both the beginning and end, late childhood is marked by conditions that profoundly affect a child personal and social adjustments. Academic and interpersonal success (and failure) effect self-esteem, self-confidence and basic outlooks of life.

About The Authors

Dr. Touseef Hussain Trak, a young and enthusiastic Botanist from Jammu and Kashmir, has many achievements to his credit in a short span of time in Higher Education. He is presently working as the Asst. Prof. of Botany at Govt. Degree College, Jammu & Kashmir. Dr. Touseef has many research publications to his credit in various journals. He has contributed a couple of chapters in the edited research volumes by Global Academic Society of India. He has co-authored a book, "Important Medicinal Plants with Rich Antioxidant Potential", LAP, Germany, and a recently published one, namely Antioxidants-The Miraculous Healers. Over and above this, Dr. Touseef is actively involved in some important projects and accessory research surveys. His main areas of interest in research are Ethnobotany and Taxonomy. His social work in the field of education is remarkable.

Dr. Deepak Kumar Srivastava, is currently working as the Principal, in Lal Bahadur Shastri Girls' College of Management, Lucknow, U.P. He is a well known Botanist, and the Chief Editor of Indian Journal of Scientific Research, as well as Indian Journal of Life Sciences. Dr. Deepak Kumar is in the Editorial Board of Indian Journal of Society and Politics, International Journal of Advanced Biological and Biomedical Research, and American Advanced Journal of Biological and Biomedical Research, and American Advanced Journal of Biological Sciences. He is also in the Reviewer Panel of various Journals. Dr. Deepak Kumar has published many research papers in various Journals of National and International repute, and is the Editor of the research volume "Recent Trends in Biological Research". He has organized a National Seminar and is the life member of the Indian Science Congress Association. Recently, in 2017, Dr. Deepak Kumar has been conferred upon with Editorial Excellence Award by International Institute of Organized Research.

Dr. Nisreen Husain, holds the current position as the Head of the Department of Zoology at Govt. Dr. W. W. Patankar Girls' P.G. College, Durg, Chhattisgarh. A Gold Medalist for her Master's degree, she started her career in Higher Education in 1984. Dr. Nisreen has already co-authored a few books, including, "Important Medicinal Plants with Rich Antioxidant Potential", LAP, Germany, and a recent one, Antioxidants - The Miraculous Healers. Also, she has contributed some chapters in the edited research volumes by Global Academic Society of India. She has many research papers and reviews published with different Journals, and has completed UGC-approved Minor Research Project. She has convened the Interdisciplinary National Seminar and a few Career Guidance Workshops. Dr. Nisreen holds the life membership of Zoological Society of Chhattisgarh, a Unit of Zoological Society of India, and also of UGC approved Indian Journal of Scientific Research. Antioxidants and Medicinal plants are her interest areas in research. Dr. Nisreen has been conferred with 'Shikshak Samman' in 2006 and 2013.

Wonder Healing of Wounds Through Some Medicinal Plants

Human beings, since ages, show inclination towards the usage of traditional medicines because of the easy availability of common medicinal plants. Several of them play significant role in healing of wounds, which otherwise is a prominent source of many infections and ailments. Wounds are inescapable events in life, that may arise due to physical, chemical or microbial agents. Healing is a survival mechanism, and represents an attempt to maintain normal anatomical structure and function. In this book, an attempt has been made to review about wounds and their types, along with an insight into different plants of potential wound healing properties which could be beneficial in therapeutic practice.

Touseef Hussain Deepak K Srivastava Nisreen Husain

The most popular talk of the town in the modern era of beauty, health and fitness, nowadays is, about 'Antioxidants'. These are the wonder-action agents that prevent the destructive effects of oxygen, and block the harmful chain reactions caused by oxidation, an essential process involved during the conversion of food into energy. The cumulative damages due to oxidation and the by-products called free radicals, accounts for aging and many age-related diseases. The antioxidants constitute the most important defenses of the human body, comprising of enzymes, vitamins and minerals. The plants with a variety of phytochemicals are the richest sources of antioxidants. The remarkable properties of antioxidants help in fast healing and reduce cellular damages. They, thus, maintain an array of health benefits, and battle to strengthen the defence mechanism and immunity.

Comprehensive and user-friendly, the book, 'Antioxidants-The Miraculous Healers' is a peer into the wonder-world of antioxidants, which gives a glimpse about the miraculous roles of antioxidants as health boosters and healers.

Dr. Nisreen Husain holds the current position as the Head of the Department of Zoology at Govt. Dr. W. W. Patankar Girls' P.G. College, Durg, Chhattisgarh. A Gold Medalist for her Master's degree, she started her career in Higher Education in 1984. Dr. Nisreen has already co-authored books, including a recent one, namely, 'Important Medicinal Plants with Rich Antioxidant Potential', LAP, Germany. Also, she has contributed some chapters in the edited research volumes by Global Academic Society of India. She has many research papers and reviews published with different Journals, and has completed UGC-approved Minor Research Project. She has convened the Interdisciplinary National Seminar and a few Career Guidance Workshops. Dr. Nisreen holds the life membership of Zoological Society of Chhattisgarh, a Unit of Zoological Society of India, and also of UGC approved Indian Journal of Scientific Research. Antioxidants and Medicinal plants are her interest areas in research. Dr. Nisreen has been conferred with 'Shikshak Samman' in 2006 and 2013.

Antioxidants
The Miraculous Healers

Antioxidants

The Miraculous Healers

Dr. Nisreen Husain
Dr. Touseef Hussain Trak

The book, 'Antioxidants- The Miraculous Healers', is a way to say 'hello' to the world, mechanisms and sources of antioxidants. An elementary review about free radicals, their harmful effects, oxidative stress and pathogenicity in the initial chapters, gives a better understanding about the importance, role and health benefits of antioxidants. The details about active constituents of antioxidant defense system, their classification and assay methods is a helpful tool for those who are pursuing research. The brief idea about the dietary choice, antioxidant rich plants, and the supplements add more to the knowledge about antioxidants. The facts, risks and special considerations about consuming antioxidants provides enough awareness. The images of antioxidant high food, fruits, herbs etc, are the appealing aspects of the book. The pool of references is a strong source of information for the readers.

Plants are known as the 'Treasure-houses' of phytochemicals that act as the most beneficial agents called 'Antioxidants'. Such powerful substances are applicable in phytoremediation and reducing of oxidative stress, thereby contributing to many health benefits. The deficient levels of antioxidants defence mechanisms is compensated from the plant sources, helping in prevention of diseases and delay in aging. This book, "Important Medicinal Plants with Rich Antioxidant Potential" reviews about the antioxidant role, and some of the medicinal plants from different parts of the world that would help the readers understand the antioxidant activity of such species.

Nisreen Husain
Touseef Hussain Trak

The authors, Dr. Nisreen Husain (HOD, Zoology, C.G.) & Dr. Touseef Hussain Trak (Botanist, J&K) are the educators, devoted towards their research work on Medicinal Plants & Antioxidants. Dr. Nisreen has already co-authored a Text Book of Zoology. Both the authors have several research publications to their credit.

Bhilai. 490020
(Chhattisgarh)

Dear Madam,
Please refer your telephonic conversation with our Director Mr. Ajay Mittal regarding offer to you for authoring a book on Chemistry for B.Sc. as per Chhattisgarh Syllabus in Hindi.

We request you to go ahead on this project and inform us your willingness for the same.

Please feel free to contact us if you have any query.

Thanking You

Yours Sincerely

Chavala
